8	Our community has a large aging population and there are many groups within and outside of the medical community that work hard to support this aging population in many ways. The community also just completed a biking and walking trail system that spans 5 cities and some other smaller communities that encourage fitness and allows for outdoor activities in a safe environment. Having 3 fortune 500 companies and the largest retailer in the world housed in our community has helped create a focus on health by encouraging the employees via cost reduced insurance programs for healthy individuals	10/13/2015 1:53 PM

21	The proudest of my community, a large faith base that steps in when needed and public safety. Something not a choice on the lists that is a big contributor is the break down of the family and support. That is a big problem in our community as well as many others. Another problem is low motivation to change and persist. Another problem is low support for agencies. There is mostly criticism of the help that is offered. They want a quick fix for problems and that isn't the reality.	10/5/2015 2:02 PM

This is a HUGE issue that NWA tends to overlook and continue to wonder why we are not making headway or a difference in our region. It is very difficult for children to learn or sit in school when they are dealing with issues at home and in their own little minds, it is in turn very difficult for parents/family/friends to help children when they themselves need help and none is available to them.	9/28/2015 1:28 PM

216	it is a very small town but there are a large number of hard working people who take care of others in their community. It is a great place for my children to grow up but unfortunately they will probably have to move when they are grown if they want a good job.	8/14/2015 8:31 AM
217	The community pulls together when needed and trys to take care of our own. People of Freeman and the community are extremely generous when a need is identified. The problem is there are so many needs that no on knows about. The greatest problem is those who take and take without attempting to help themselves which begins making people less likely to contribute.	8/14/2015 8:23 AM

229	Doing the best we can w what we have to work with	8/13/2015 1:11 PM
230	People from the Springfield community are generally willing to help their neighbors. However, due to prejudices, lack of information, limited exposure particularly to those who are POOR or marginalized for whatever reason - generational, race, homelessness, involved in jail or drug system, and mostly lack of job opportunity or adequate transportation -- community members do not understand their needs and feel that the recipients of help must be "worthy" in some way of their help. I think we would be a better community if we looked at others how Jesus/God sees them, not with judgment, but with unconditional love AND financial resources. Our money has to go behind what our mouth says. There is great divide between the rich and poor in this community and the quality/availability of medical care they receive.	8/13/2015 12:17 PM
231	Everyone's charitable spirit. Cooperation among people of diverse groups.	8/13/2015 11:07 AM

251	Joplin is a community that cares about kids. The Joplin Family Y is proud to be able to offer financial assistance to provide quality child care services that support working families by keeping kids safe, supervised and physically active. Our fundraising efforts in the community for this purpose are generally successful because people believe the cycle of generational poverty can be broken by dedicating resources to children. 260	The MPH program relies on the local county health agencies to serve as mentors during the student internships. although this requires a great deal of effort on the part of the agency directors, they have been most support and professional with regard to the students and have provided excellent experiences.	8/10/2015 6:02 PM
261	I'm proud that so many churches are willing to help out when they can. They help fill the gaps between all our agencies and often partner with us to assist a client who otherwise would have fallen through the cracks. My perspective is that many community agencies partner well with us, but very few can help with housing or the tangible needs, such as fixing a broken-down vehicle or getting food when the pantries aren't enough.	8/10/2015 4:15 PM

Kids don't play for a variety of reasons due to family and possibly unsafe conditions or access to parks in town. We also need to preserve our open space to keep Benton County and our towns both asetically pleasing and environmentally sustainable.	9/29/2015 4:01 PM

307	Right now absolutely nothing. My community is so disappointing and boring. My community is wasting money on sidewalks instead of encouraging business and fun affordable things to do. The families would do so much better and so would the retired if there were exciting and fun things to do and look forward to. We do need sidewalks, but get real. People need to be encouraged to work. The elderly need part time to help supplement their income and give them a purpose. Less make nursing homes almost a thing of the past and use talents to develop ways to encourage everyone from newborn to 100 to actually live and not just survive. Retired people have so much experience and knowledge and young minds are ready to soak up all this knowledge and build on there experience. God did not grant us the gift of life to just survive.	8/20/2015 9:04 AM

312	I like that it is a small community, but this community lacks a police force that can rid the drugs. This community has done a good job of improving downtown small business and park system, but the skatepark brings in a very bad crowd and this crowd keeps many of us from taking our children to enjoy the parks, using the walk track, tennis, basketball, etc. This crowd needs cleaned up so that we can enjoy the park with our children. There needs to be incentives for larger business to choose Aurora as their place of bussiness, possibly tax breaks for generating jobs. I am not familiar with Drs in this area, I take my family to Springfield for Dr appointments. Improve communication of what is even available in this for health care would be good. Crime in this area typically tied to domestic violence, connected to drugs/alcohol, needs to be stricter punishments for abusers. More drug raides, to push drugs out, more child awareness programs, improve D.A.R.E programs, many kids do not even know what this is. I also do not like that our local police department spends their time in Marionville. We need visible police in our community, driving the park, actually getting out of their patrol car and communicating to the public would be a great change for once.	8/20/2015 8:28 AM

Also having an ER, but would like to see the community have a newer and better equipped hospital so people wouldn't have to go to larger hospitals for care or tests. Transportation to and from appoints can be an issue for elderly or others who may not have family that can take them. Cherokee County as I understand is one of the poorest counties in Kansas. We also have a medical equipment business owned by the pharmacist in town which trys to accomodate supplies, but doesn't have much in stock and immediately available if needed. Have to wait on orders to be made and take up to 2 or 3 weeks to receive. ## Regional Health Assessment

361	<p>Honestly, I'm not very proud of this community. Actually, I'm rather embarrassed. I have lived here and operated a successful business for 20 years. When I first started over 80% of my business was from citizens of Aurora. Over the years my business has gradually increased, or at least remained the same. Today, 38% of my business is supported by Aurora citizens. That's sad. As my clients move away or pass on they are not being replaced by other Aurora citizens. Why? Most likely because people living in Aurora are made up more and more of uneducated welfare recipients and/or ex convicts Simple as this, they cannot afford my services. We live in a city that is very lax in enforcing ordinances and law. Add all the welfare services at an arm's reach and it's a very attractive place for deadbeats to live. Look around, it shows. If I were to drive through this community looking to relocate a business or my family, I would take one look at the quality of residents, the condition of our streets, the hundreds of homes and buildings in complete disrepair, the horrible condition and danger of the three sets of RR crossings, the unkempt yards and businesses, the poorly managed police department, the number of social services programs and the percentage of people using them and I would immediately look elsewhere. This is not a prosperous community. As far as what makes me proudest? White Park. We have a nice pool, trail, tennis courts, volleyball court, skate park, restrooms, water fountain and some baseball fields. Add a little police presence to run off the riff raff and it would be almost perfect.</p>	8/19/2015 9:46 AM

## Regional Health Assessment

385	I live in a rural area; my address is Crane, MO but I work in Springfield and relate more to what is going on there. I believe groups such as Community Partnership are doing a good job. I also think several of our churches really care about their community.	8/18/2015 2:52 PM
386	We are close to activities that are family friendly (Branson, Roaring River, Zoo, Discover Center etc); while being able to live in a small community. We have good schools, a new high school, and the city has been working on a project to put forth a more welcoming image for new people. New sidewalks, roads repaved etc, although it was at the cost of our beautiful tree lined main streets.	8/18/2015 2:40 PM
387	The "small town" family feeling. Most everyone knows who people are and are always very friendly.	8/18/2015 2:39 PM
388	The community works together to solve problems and support those that have a need.	8/18/2015 2:39 PM
389	Folks care about one another and are willing to help those that need a hand.	8/18/2015 2:37 PM
390	Good accessible local hospital	8/18/2015 2:36 PM
391	Values of individuals in our community are very good for the most part.	8/18/2015 2:30 PM

393	The ability to band together no matter what.	8/18/2015 1:57 PM
394	I am most proud about the teamwork and caring way we take care of our patients here @ Mercy Booneville.	8/18/2015 1:36 PM
395	There is alot of effort all of the area communities to connect with citizens and bring them together as a "community". Volunteers are never hard to find for community events, if tragedy the majority of people truly do come together to help those in need. There are many programs available to help the less fortunate - not just by giving hand outs but by providing opportunity.	8/18/2015 11:14 AM
396	Little Crime and low population.	8/18/2015 10:57 AM
397	The way organizations work together to meet the needs of the community.	8/18/2015 10:31 AM
398	Many programs for weight loss, diabetes etc are offered at Cox South and Springfield locations. Branson has very limited offerings. Also what is offered does not take into account 10 hours shifts. Example 0800 to 1830. Is Cox truly interested in employees?	8/18/2015 10:29 AM
399	The way that people and organizations come together around an issue and collaborate to solve it.	8/18/2015 10:23 AM
400	the quality of life is pretty good however one issue not reflected in this survey is transportation. If you don't have a car, you have a very difficult time accessing healthcare in this community. A better bus system is needed.	8/18/2015 10:20 AM
401	small community (1200) we all look out for each other.	8/18/2015 8:39 AM

413	Everyone is connected in our community. We have young and really old and everyone in between. We have many people live in pointe ROYALE and work here. It is the best community we have every lived in. The amenities are amazing and the gold course is awesome. Branson is a unique community. People learn to make money in high season and then live on subsidies in low season. I really admire them.	8/17/2015 3:47 PM
414	I am proud of the beautiful land and lakes. Great outdoor activities available. I am not proud of the way Taney County spends our tax dollars. There needs to be more accountability.	8/17/2015 3:47 PM
415	Great parks and trails.	8/17/2015 3:47 PM

430	great place to live	8/17/2015 11:28 AM
431	Honestly, I would be proud of my community if I saw efforts to include and educate the ENTIRE community... Most events seem to be targeted to special interest groups. I don't feel the community includes my demographic...Middle-aged, divorced, female, with no children at home....Believe it or not, there are many more of us out there than you might think. I just want a safe place to learn, grow, and get healthy. It would help if I knew how/where without having to spend a fortune on a gym membership that I'm just going to forget about when the newness wears of and I get discouraged.	8/17/2015 11:27 AM
432	Great medical centers, doctors who are well trained and you can trust, safe place to live.	8/17/2015 10:49 AM

435	We're proud to live in a place where people are caring and trying to improve the quality of life for others. Our current concern is the cost of medicine under Medicare and falling into the Donut Hole with paying \$500/ plus a month for meds from March to Sept. No one ever seems to have an answer for that.	8/17/2015 10:22 AM

472	If this is the last question, I'm going to use this space to address your survey. It doesn't seem that you had it reviewed by anyone with expertise in survey design. Who is conducting this survey? What will it be used for? You have not defined what "community" the survey is about. Since I found it on a friend's Facebook post, how do you know people from other "communities" aren't answering it? Some questions are double-barreled (i.e., effect on health and quality of life--health is a separate domain from quality of life, so what am I answering on this question). Some ask about "you" and some about "you and your family", which is entirely different. My answers would be completely different for myself than for my husband. Am I supposed to "average" them, choose lowest or highest common denominator, or what? The list of health issues, barriers, etc. does not seem comprehensive and there is some overlap between choices (such as aging and chronic diseases). I am sure there are standardized, well-tested questionnaires already out there in the health behaviors/risk factors field that could have been used.	8/15/2015 7:36 AM

492	People seem to really care about each other. I came from a large city (Atlanta) where there were plenty of resources but little sense of community. Though I am very new to the area, I think there is a much better sense of community here. My family and I just need more time to get "plugged in" and get to know the people.	8/14/2015 12:17 PM

535	I think we have great law enforcement here which helps keep our community safe. We need to appreciate the risk they take every day. We also have many self owned businesses that keep our economy afloat. I would like to see Wal-Mart bow out of our community as they are making it harder for the other food stores and locally owned business to stay in business. 605	Sorry I can't really think of anything. I now travel to KU medical for my medical treatment because of the poor care and lack of interest in Freeman doctors to try to provide me with acceptable medical care. I would have died if I had stayed here. Not one freeman doctor will let you be referred by any other health care provider other than a freeman primary care doctor. Also they have no doctor on call. Freeman wants everyone to go to their emergency room. That way they make more money instead of providing the appropriate medical care in a timely manner. I also have a grand baby that must go to St. Louis to get the medical care she needs because no doctor down here is capable of taking care of her.	8/5/2015 8:29 AM

If you lost everything or even something in the tornado, pack your stuff and get a fresh start somewhere that is NOT here. This is no place to raise a family or make a life. Our school systems are a joke, our community is uncaring, our economy is broke.	8/5/2015 1:12 AM

I greatly appreciate seeing our community take a stand for our faith, because it truly does impact how well we serve the sick and those in need. 620	Being from Joplin and have moved away for a number of years proud to call Joplin my home. Would make me prouder to have higher paying jobs for all and more affordable housing for moderate income senior families. Healthcare costs for moderate income families or families that fall in the Medicaid Gap are significantly impacting the health of certain populations within Missouri. With having to choose extremely high deductibles for your medical coverage it is sad not to be able to afford to go the doctor or those who have to choose to eat or buy your medication as many of the seniors or gap residents experience.	8/4/2015 9:07 AM

200	Don't know how to answer that. There is some help available, but too many restrictions. Just an example- I recently received medicaid, but I can't get dental help. I have bad periodontal disease, 11 chipped and majorly broken teeth and reaccuring abscesses and pain. All I get when I ask Jordan Valley for help is.... You wouldn't believe the people with bad teeth we see. Some are a lot worse ten yours- therefore, no referral. I can't work and I'm in the 3rd year of fighting for disability. That's with an attorney. Every professional that I've come across regarding this matter, just don't seem to understand the urgency of things. I get that things could be worse, but right now it seems pretty bad. Im not going into detail about my physical and mental problems right now, but if I didn't have problems before- this hard been enough to cause extreme depression. It seems like a hopeless situation. For all concerned- enjoy and appreciate your health. God forbid that it's taken from you. Once again...it's a hopeless and desperate situation. I just would like to be understood and taken seriously! Where is there help? REAL HELP?	9/4/2015 8:18 AM
